Built for Industrial Excellence WHEEL BLOCK

CAPACITY RANGE UPTO 50TONS

Craftsman Wheel Blocks are engineered for exceptional performance and reliability, developed by our team of experts with years of industry experience. The modular system offers quick and cost-effective solutions tailored to your specific needs. Made from spheroidal graphite cast iron, the CRWB housing, cover, and wheel ensure structural integrity. Bearings are thoughtfully chosen to match practical load conditions, providing low maintenance. Available in a range of load capacities, the wheels are designed to meet the evolving demands of industry.

WHEEL BLOCK

Applications: Crane Systems | Transfer Carts | Lifting Platforms | Conveying System

CraftsmanTravel Drives feature a parallel shaft helical gearbox paired with an electric motor, delivering an efficient and compact drive solution. The gears, made of case-hardened alloy steel and profile-corrected, are designed to maximize transmissible torque. Both gears and bearings are oil bath or splash lubricated for quiet operation and enhanced reliability. The electric motors are three-phase induction types, meeting the latest IEC/IS standards.

KEY COMPONENTS

WHEEL BLOCK FEATURES

- Ready-made solutions for crane manufacturers
- Wheels fully machined from spheroidal cast iron (SG-700/2)
- Double-flanged wheel for wheel block
- Robust grey iron housings
- Wheel flange wear indicator for easy inspection
- Ball/taper roller bearings for long service life
- Center mark in housing for easy span setting
- Modular design for various mounting positions
- Easy dismantling and maintenance for cranes and other applications

TRAVEL GEAR BOX

- Case-hardened, precision ground gears for smooth, long-lasting operation
- Gears immersed in oil/grease for quiet, smooth, and cool performance
- Standard travel speeds: 20, 30, 40 m/min at 50 Hz
- Easy dismantling without removing wheel blocks

TRAVEL MOTOR

- Heavy-duty motor with integrated brake and fan cooling
- Asbestos-free brake disc lining with high friction and long lifespan
- IP54 enclosure rating and F-class insulation
- Suitable for 3-phase, 415V±10%, 50Hz AC supply
